You'll need a little help dressing up as the Legolas Elven Prince from the Hobbit movies, The Desolation of Smaug and Battle of the Five Armies. You'll learn how to rock the Legolas Hobbit costume for Halloween and cosplay with this detailed guide. Strictly speaking, this is one elf who technically should not appear in the film version of The Hobbit, as he does not appear in a book written by JR R Tolkien. But I can't be the only fan who was very happy to see him back reprising his role. Legolas Greenleaf was written in a script, in much more than just a cameo role, because Thranduil, the king of the Woodland elves, is his father, and this king is the actual character of the book version. The detailed Legolas Hobbit Costume Elfen Clothing Guide for Halloween and Cosplay Legolas in the film The Hobbit, The Desolation of Smaug, looks a little different from its previously shot Lord of the Rings appearance. You can still get older Lord of the Rings outfits and accessories, but they're just a little different. Contact my Legolas LOTR costume guide if you want to take on this particular look. Get a Legolas costume from Amazon.com/Amazon.co.uk The Hobbit is set 60 years before the actual LOTR event takes place, and so we see a much younger version of this elven prince. It's kind of ironic, since the actual actor, Orlando Bloom, has aged significantly since filming for the original movies ended. The Lord of the Rings Legolas wore pretty simple travel clothes mostly in mossy wood greens and natural browns, as you would expect for the Elf Forest. He also wears the cloak of the Ring Brotherhood and the clasps that were a gift from Lady Galadriel in this film. This character in The Hobbit does not yet have that special, magical scholarship cloak and doesn't have that particular gift of bow that Lady Galadriel gave him either, but another. That's because the items she presented to him come long after the events that we see in the desolation of Smaug and the Battle of the Five Armies movies. UK Readers get a Legolas costume from Amazon.co.uk you may have trouble getting official versions of this character's costume clothes from The Hobbit. Many that you can buy old style versions from The Lord of the Rings rather than. I think because they're so similar in style. The good news is that as long as you get the hair, ears, and outfit colors right for that character, everyone will know exactly who you dress like. So you can still get the original costumes or make your own versions based on that look. The children's version of the official Legolas costume comes with tunic, cloak, belt and tops and gives a quick way for the child to dress up as their favorite character for Halloween. To complete the look you need to add on the wig and toy bow that are not included in this set. The official version for Very similar and also contains tunic, cloak, strap and boot tops. As I mentioned, this particular infamous cloak does not exist in the Hobbit movie, although it may well be worn by another. But if you dress up as a new version of Legolas for the latest movies, I'd ditch the cloak altogether. This cosplayer nailed the entire Legolas Halloween costume to look from his long blonde hair and pointed elven ears to tunics, hand cuffs, bow, arrow and quiver on the back. You can imagine it pretty much from one of the films directed by Peter Jackson. To be persuasive, be sure to add in some arm braces or guards, some manes or leg protectors and some body armor. Try looking at Etsy or Ebay for those items since sellers who make leather braces and armor and can make them to spec too. In addition, you can go on creating your own use of lightweight fabrics like felt that can be easily cut into shape or even craft foam. You can draw on the design on top. Legolas hairstyle, wigs and ears They decided to keep the hairstyle of this character the same through movies. Thank God. Why mess with something that's really perfect? Legolas has very blond golden hair that is straight and long. It falls well below his shoulders. He wears these hair swept back elegantly from his face so he can never distract him by blowing through his eyes. In front of his hair where the bangs or fringe would be if he had any, and most of the sides swept back and braided on the back. Then he has two small, thin braids, one on each side of his head. You can buy some official wigs for this character. However, they are really and truly awful! Although the styling looks normal, they got the color completely wrong and made it brown rather than light. And everyone who's seen the movie knows how golden these hair is. If you have suitable long hair, you can style it yourself or buy a long blonde wig that can be styled instead. My advice is if you don't have long blonde hair to work, buy a straight long blonde wig that will most likely be one for a woman or girl, and braid it yourself. You can get a step-by-step weaving instruction for Legolas. This video shows you a simple version of how to style your hair to get the kind of hairstyle that Legolas wears in both The Hobbit and Lord of the Rings movies. It shows you how to do this with simple weaving techniques. There are 2 braids, one is worn on the back of the head and is made of a long fringe that brushes back at the top of the hair. There are two more braids, one on each side, and it's both very thin. The braid at the back is made using herringbone or fishtail braid technique. Elf Ear Tips Add More realistic elf look, like all Tolkien elves, Legolas ears slightly pointed to tips. You can achieve this effect for your cosplay or dress up with a number of techniques that I will discuss in more detail. One of the best ways to get a realistic elven ear is to use special ear prosthetic tips. Not everyone can wear ear tips. Most of them are made of latex, which is a problem for someone with allergies. Rubber-based ones are often latex-based too, so be careful with that. For people who are not allergic to latex, these ear tips are an excellent choice. They come as an unpainted version that you apply with the spirit of the gum and then can paint with makeup to match your own skin tone. Different techniques to get yourself some Pointy Elfen Ears: Use a simple technique with a sticky sellotape to stick your ears in shape on the tips and then paint over the foundation tape in your own skin color. Buy some latex ear tips and glue them using a special type of glue such as alcohol gum or liquid latex. Obviously this won't work for anyone with latex allergies. Wear some metal or wire elf ear cuffs. The elf ear cuffs metal and you wear like jewelry over your ears. These are decorative wire designs that sit over the top of your ears. They are aimed at the top and have a real fantasy look and feel to them. This can be a good option if you have a latex allergy. Legolas Weapon Suit Accessories He Woodland Elf and loves to use bow and arrow as his weapon of choice. This is not the same galadhrim Elven bow that Legolas was given to Lady Galadriel and which he uses during much of his Journey Lord of the Rings. This particular bow is set for another 60 years in the future history of the Hobbit. The bow he carried for an earlier Story of the Hobbit would likely have one style in Mirkwood which is his kingdom. But we know that he uses a bow as well as two of his battle knives or daggers as they are clearly visible in the desolation of Smaug which is the second Film Of the Hobbit. Of course, Legolas need something to carry all its arrows, and for that it wears a quiver that you can see. If you're going to get any accessory at all for this Middle-earth character, you better make his bow as this is the item he's most strongly associated with. These skills were put to great advantage on his fraternity ring quest when he single-handedly shoots Oliphant, a huge giant elephant-like creature. One choice to work with your outfit is a wooden bow and arrow set that comes with three arrows and a quiver too. Although it's not one you can put on your back like Legolas. It is made of wood and has a nice natural look to it, which will be good with Tolkien Elf's clothes. Back quivers tend to work a bit pricey. I like the way it looks because it is made of brown leather and has a simple style that looks perfect for the forest elf theme. You can try to do Look like yourself slinging through your back and keep your artificial arrows. Legolas Battle Knives True fans will love the authentic collector knives. They were produced for both LOTR and The Hobbit films. There is a difference in styling with Hobbit ones looking much more natural in choosing wooden colored pens. Collector's figures show an elven prince with his two arms of hand, and you can also see the tops of them in the back of the quiver when not in use. How to dress like Legolas from The Hobbit Here's a full character costume and cosplay checklist. It's rundown about what the elf Prince Woodland Realm wears for the Hobbit movies. 1) Clothing with long sleeves medium green under the tunic. 2) Short-sleeved long green tunics over this in a dark shade. This tunic falls to its knees like a skirt and sits under a bulletproof vest. 3) One pair of dark, forest green hand braces with gold color scrolling detail. 4) A beautiful and sophisticated piece of body armor that looks like it's bronzed in parts with lots of gold color detailing. Shoulder plates are complex gold sheets of designs. 5) Long tight trousers or trousers that can hardly be seen, perhaps in brown. 6) A pair of complex manes (leg armor) that protect his lower leg from knee to ankle. It is a brown skin decorated with gold colored structures. 7) Brown shoes. 8) Through the back of a brown quiver that holds his arrows and his two battle knives. 9) He holds his large wooden bow, which is also decorated with gold markings. There was little controversy over whether this character was to be in the desolation of Smaug and the Battle of the Five Armies, because this Prince Woodland realm did not appear anywhere else in the text of the Book of The Hobbit. I am thrilled, however, that his character is back on screen to please us fans again. People can argue long and hard about whether he should have been in the movies or not, but it would have been a lot less watchable without him. Girls can also dress like Legolas too and are often more successful I might add, since Tolkien elves have a pretty feminine look on them, which is usually easier for women to take off. Plus you might already have long hair to style as a woman too. Fun to play the role of this very cool fantasy character.
